

PROD 06SCII

Pro Series 6 Professional Dryer
Stainless Steel with Titanium Panel

SENSING THE DIFFERENCE

KEY FEATURES	KEY BENEFITS
• 6kg large capacity	• Space to dry your entire wash load
• Guaranteed for commercial use	• Ideal for heavy domestic use (football mums) and small businesses with space limitations, pubs, clubs, hairdressers, nursing homes etc...
• Sensidy Automatic sensing system	• Patented system that measures the relationship between humidity and temperature which gives more accurate sensing than traditional sensor dryers
• Temperature sensor	• Select low temperature and the sensor will maintain a stable low temperature ± 1 degree C for safer fabric care on delicates
• Condenser dryer with large capacity condenser - vented model available	• No external venting required, higher specification, more efficient, short drying times. *Condenser is also removable for easier cleaning
• Coin-op ready	• The machine is prepared ready to connect to an external coin-op or smart/chip card system
• Direct drain system for heavy use	• More convenient, no need to empty the bottle after every cycle, less maintenance
• Top bottle water container	• No bending down required
• Stainless steel drum and bulk head	• Higher quality, stronger and better corrosion resistance
• Double lint filter	• For more efficient lint collection which means less lint build up in the machine - a safer and more efficient drying performance
• Removable fan for easier cleaning	• If any lint does get past the double lint filter and builds up around the fan in very heavy use, there is no need to call an engineer, simply remove the fan and clean yourself
• LED water container and filter full indicators	• Automatically informs you when it needs emptying
• Stacking kit option AMC973 (80 03437 798016)	• Allows matching dryer to be safely stacked on the washer - saving valuable space
• Optional pedestal	• 2 versions available: open style or with drawer for extra storage space for laundry consumables
• Butterfly drying action	• Tumbles in a figure of 8 pattern due to the unique paddles, meaning no need to reverse tumble which speeds the drying process and is less stressful on the motor and drive components
• Easy control	• 8 auto programmes built in - press the programme button and start (11 language options)
• Ball bearing support	• Others may use plastic drum front bearings but using ball bearings greatly increases the durability and life of the product
• KidSafe	• Start delay programme - if a child climbs into the drum and closes the door it will not start immediately

*Compared to a standard condenser dryer

WEIGHTS AND DIMENSIONS

Dimensions (hxwx d) mm	850x595x595
Packed	910x625x695
Weight (kg)	39
Packed	40
WEEE Directive	Class 1

TECHNICAL DATA

Availability	12 NC	8575 903 10000
EAN Code		8003437970184
Available in		Stainless Steel with Titanium Panel
Predecessor model no.		HDD 06SC WG
Power supply		230V/50Hz
Fuse Ampere		10A
Heating power (watts)		2500
Photo reference		
Type		Condenser

FABRIC CARE PROGRAMMES AND OPTIONS

No of programmes	8 pre-set programmes
------------------	----------------------

TIME MANAGEMENT

Sensing system - automatically adjust the time depending on the load
 Sensor automatically stops drying on achieved desired dryness
 Programme status indicator
 Large condenser for quicker drying
 No need to reverse tumble so shorter drying times

CONVENIENCE

6kg extra load capacity - space to dry your entire wash load
 Simple user interface - press the programme button and start
 Large opening for ease of loading/unloading
 Prepared for coin-op/smart card
 Easy access front filter
 Auto anti-crease - releases creases, saving you effort when ironing
 Auto cool down phase - remove garments ready to wear
 Stacking kit option - comes with stacking kit as standard

PERFORMANCE

Energy efficiency	C
Noise level db(A)	70
Consumption (based on 5kg cotton cupboard dry)	
Energy/programme	3.65

OTHER KEY FEATURES

Butterfly drying
 Stainless steel drum and bulk head - heavy duty, durable, high quality material
