

PROW 0612IIM (Medical)

Pro Series 6 Professional Washing Machine
Stainless Steel with Titanium Panel

SENSING THE DIFFERENCE

KEY FEATURES	KEY BENEFITS
• 1200rpm spin speed/G Factor: 362	• Spend less time drying your garments and more energy efficient when using dryer
• Guaranteed for commercial use	• Ideal for heavy domestic use (football mums) and small businesses with space limitations, pubs, clubs, hairdressers, nursing homes etc...
• Pro Express cycles	• Maximum heater wattage and hot and cold fill, fast drain allows much faster cycle times than a conventional washer without compromising on the performance. Super Quick wash circa 20 mins
• AAB Class	• Excellent wash performance and energy consumption
• 4 machines in 1: 4x separate sets of programmes for different applications	• Select the best programme set for the application: Medical, EU programmes, US programmes, Mop - 8x programmes within each set. Set programmes can be set by end user, no need for engineer
• SensiSave consumption sensor	• Saves water and energy by sensing the load size - washing 2kg instead of 5kg saves 20 litres of water and 0.3 kwh
• Smart seal, bellowsless design system	• No bellows between the tub and cabinet front, so nothing to wear out, leak, or build up lime scale and slime. More reliable, cleaner and easier to load and unload
• EasyControl system	• 1 touch operation, feedback on wash temp, spin speed, remaining time and can be set to language of your choice (12 language options)
• Hand and wool wash programmes	• Despite the vigorous wash performance on heavy fabrics, these programmes have been specially designed and are shown to be even more gentle than actual hand washing
• Large 31cm door opening	• Easier to load and unload
• Balance control system	• The machine gauges and calculates the load balance and decides whether to spin or re-distribute the load. It will attempt to spin up to 10 times at full speed and then a further 5 times at a lower spin - if it still can't balance the load, it will not spin and avoid damage to the machine or surrounding units
• Kidlock	• Controls can be locked to avoid children or unauthorised users changing the temperature and spin speed or opening the door
• Coin-op ready	• The machine is prepared ready to connect to an external coin-op or smart/chip card system
• The maximum water blocking safety system	• Smart seal, water overflow protection, anti block pump, extra strong 'PEX' hoses (insurance companies consider them as strong as a copper pipe). Maximum fill time shut off, water proof bottom plate
• Pedestal option	• 2 versions available: open style or with drawer for extra storage space for laundry consumables
• Full sound insulation	• Reduces noise levels and cabinet drumming
• WRAS listed/certificate number: 0810058	• Tested and listed in the Water Research Advisory Scheme directory to the highest fluid category 5. So can safely be used in Domestic, Catering, Healthcare, Launderettes, Commercial laundry businesses, Residential and Daycare centres, Laboratories, Mortuaries or premises where animal wastes or body fluids are present
• Dump/outlet valve	• For medical applications a model with an outlet valve instead of a pump
• Designed for professional use	• Galvanised bottom plate, 4 shock absorbers, stainless steel drum and cast iron weights with no rubber bellows
• Removable drum lifters	• No need to call an engineer to remove the lifter (paddle) and remove items such as bra straps and wires
• Marine application models available	• 60Hz models available for marine or similar applications (to order only)

Matching dryer (s)	PROD 06SCII/ PROD 06SVII
Power supply	230V/ 50Hz
Fuse Ampere	10A
Heating Power (watts)	3000
Photo reference	
Weight Gross Net	73
Spin Speed (rpm)	1200
G Factor	362

FABRIC CARE PROGRAMMES AND OPTIONS

No of programmes	4 different programmes with 8 programmes within each: MOP, EU, Medical and US programmes
Special options	4 programme sets
Wool wash	Yes
Hand wash programmes	Yes

TIME MANAGEMENT

SensiSave	
Hot and cold fill	
Powerful pump or drain valve	
Super quick wash	
Higher heating element	

CONVENIENCE

6kg capacity	
Easy control - one touch operation	
Large 31cm wide porthole door - for easy loading and unloading	
Easy access front filter	
Max 1200rpm spin speed - reduce drying times (rest humidity 55)	

Pedestal option - no bending down and storage for laundry consumables
Removable top to build under a low work top
Kidlock

PERFORMANCE

Energy efficiency	A
Washing efficiency	A
Spinning efficiency	B
Noise level wash/spin db(A)	54/73
Energy consumption (based on cotton 60°C prog.)	
Kwh/programme	0.82
Water consumption (litres)	62

OTHER KEY FEATURES

Spin imbalance correction - redistribute load automatically in order to protect the machine
Coin-op/smart card ready
Child lock - prevent accidental operation
Hot and cold fill - maximises your existing hot water supply
Temperatures on selected programmes can be pre-set to specific application requirements
Full noise reduction pack - minimises noise
Full range of accessories to support the range - storage baskets, drying cabinets, roller irons, pedestals, ironing boards etc...

WEIGHTS AND DIMENSIONS

Dimensions (hxxwxd) mm	850x595x600
Packed	910x625x695
Weight (kg)	73
Packed	80
WEEE Directive	Class 1

TECHNICAL DATA

Availability	June 09
12 NC	8575 904 10000
EAN Code	8003437970184
Available in	Stainless Steel with Titanium panel
Predecessor model no.	HDW 0614 WG
